SPECIAL INSTRUCTIONS

PLEASE READ BEFORE SHIPPING YOUR PARTS

HOW TO CLEAN YOUR PARTS - Please make sure that your items are degreased, clean and dry before shipping. Do not send us parts that are dripping with oil. Please clean them with brake cleaner or another type of degreaser. We don't want the oils contaminating our blasting media. WHAT TO REMOVE Make sure there are no bushings, bearings, seals, races, rubber, plastic, valve stems, weights or labels with your parts.Please remove these items prior to shipment. SAND BLASTING - Most parts require sandblasting and hand sanding prior to powder coating. Blasting charges vary due to the difficulty of the part to blast. MASKING -The prep department at Custom Powder Coating is familiar with most common areas on automotive parts and motorcycles that require masking before coating. We will automatically mask these surfaces as well as all threaded holes with silicon plugs and high temperature tape. If you have specific masking requirements, please include a detailed explanation with the shipment. SHIPPING CHARGES: Parts will be shipped via UPS ground unless otherwise indicated. Custom Powder Coating will take extreme care in wrapping and packing your parts so they arrive in excellent condition. Custom Powder Coating is not responsible for extreme damages caused by the shipping company. DISCLAIMER: Custom Powder Coating is not responsible for the structural integrity of items due to their age and condition prior to restoration. Custom Powder Coating is also not responsible for holes (due to rust) after the sandblasting process, or breakage of bolts during the disassembly or asssembly process.
